International Cricket Council

International Cricket Council Survey of Member Countries

This survey aims to provide baseline data for establishing priorities in the development of cricket within your region and as a tool to monitor progress towards these priorities over time. The information collected by these questionnaires should also prove a valuable document for each National Body – providing you with a greater understanding of cricket activities within your own country. You should see this as an exciting opportunity to find out more about the statistical progress in your country over the past year, helping you to analyse its performance – determining strengths and weaknesses while assisting in prioritising tasks for the year ahead.
